UNPARALLELED COFFEE BREAK.**

HIGHLIGHTS & FEATURES

ONE-TOUCH CAPPUCCINO AND LATTE

For an irresistible, creamy foam consistency, the integrated milk carafe froths the milk twice, removing bubbles and impurities. At one press of a button, a splash-free flow of velvety foam pours straight into your cup at a comfortable temperature. Thanks to the powerful double boiler, it can steam for milk frothing and brew espresso immediately after for perfectly hot drinks without the wait.

MEMO FUNCTION

Once you've chosen your ideal strength from the 5 different settings, you can easily save it with the Memo Function, as well your desired length and temperature. Then every cup in the future will be customised exactly to your taste. You'll never have to remind it again, unlike the local barista.

HYGIENIC STEAM CLEANING CARAFE

Maintaining high hygiene has never been this easy. Thanks to the Steam Cleaning Cycle, the frothing mechanism will be automatically cleaned, removing milk residues without the need to empty the carafe. The hygienic performance is certified by the independent German test institute, VDE.

DESIGNED AND MADE IN ITALY

An elegant vision of pure design, this machine looks as refined as the coffee it makes. The stainless steel front, inspired by Italian design and craftsmanship will stand the test of time in a classic or modern kitchen. Add to this its intuitive design features, and it becomes a richly fulfilling coffee experience.

SPECIALTY COFFEES AT ONE TOUCH

From, espresso to frothed milk, there is an assortment of options waiting to satisfy your coffee cravings. Whether it's first thing in the morning or an after dinner treat, there's a taste for any time of the day, right at your fingertips.

UP TO 5000 CUPS* WITHOUT DESCALING WITH AQUACLEAN FILTER

The new and patented innovation, AquaClean water filter, ensures you make the most out of your full automatic coffee machine. By changing the filter at machine request, you will not need to descale your machine for up to 5000 cups*, while getting the benefit of clear and purified water. As an added benefit, the descaling notification alarm is automatically deactivated once AquaClean is installed.
